

simply celtic

REVISED and EXPANDED EDITION

By

Joe Collins

Simply Celtic was originally published in 2000, offering some great arrangements of Celtic tunes for the mountain dulcimer in DGd and DAd tunings. After 10 years of great sales, it is time for a new edition. There are significant changes that will make the 2010 edition a classic in its own right.

Here are some of the differences:

- 41 separate tunes are in the new edition compared to 25 tunes in the original.
- The new edition comes with a very detailed chord chart for the DAd tuning.
- More artwork in the new edition.
- Except for one DAC tune, all other tabs are in the popular DAd tuning. In the original version, 8 tabs appeared in the DGd tuning.
- 4 of the tunes that appear only as DGd tunes in the original appear in DAd.

Good things that haven't changed:

- Binding that allows the book to lay flat when opened.
- High quality paper to insure that you see only one side of a page at a time.
- An optional companion CD on which songs are played exactly as they are written in the book.

Cost: Book - \$16 Companion CD - \$7

See the next page for a complete list of tunes arranged in alphabetical order.

Contents of the Revised and Expanded
